LOSS SAVED**

# T is for Thermapool Government Grants

If you own or are thinking of building a swimming pool, renovating a pool or even changing the liner you should contact Thermapool, the only government approved pool insulation system on the market. Energy saving Government grants of up to £3,500 are available towards the cost of insulating your swimming pool; in some instances the Thermapool system is free!

At the end of 2010 the Building Regulations will change to incorporate swimming pool insulation as a statutory procedure, these subsidies will no longer be available.

**Research guarantees when conditions are warm and sunny during summer months, outdoor pools insulated with Thermapool and using their clear cover, pool owners will not need to heat their pools!**

**For more information on Thermapool Insulation or to get a quote, please contact topic UK Ltd on 08701 662 532 or email [info@topic-uk.com](mailto:info@topic-uk.com).**

**Independent research has shown that Thermapool retains 86% of heat normally lost into the ground, reducing the average domestic pool owners heating bills saving £10,500 to £25,300 over ten years and preventing 20 - 55 tonnes of CO<sub>2</sub> being released into the atmosphere.**

These subsidies are available to everybody regardless of financial status. Larger subsidies are available to anybody living in the property over 70 years of age or is on the Government's Fuel Poverty list which can be found on the Thermapool website.

**If all swimming pools in the UK were insulated with Thermapool the energy saved would reduce Carbon Dioxide emissions released into the atmosphere by 786,279 tonnes each year. It would take a forest much larger than Greater London to absorb this amount of CO<sub>2</sub>!**

Thermapool is the world leader in the development & production of swimming pool insulation. Thermapool is manufactured in the UK and is shipped across Europe, the USA and Australasia.
